Significant State Activity

Other Immediate Concerns

- **Active** Current flood risk is spring runoff, increasing streamflows, and snowmelt. Some reported flood-related landslides are being monitored.

TLP: WHITE

Disclosure is not limited.

Current State (SERT) Actions

- **Update** The DEM PIO continues to provide media engagement and media coordination with other staff to provide emergency public information as needed to the flood response efforts. These activities have occurred, and continue to occur, daily throughout the flood season. [ESF #15]
- **Active** Activated Emergency Support Functions: ESF #1, ESF #5, ESF #14, ESF #15, Logistics, VDCT, and Finance.

Current Operational Requests

- **Update** 9 active requests are in progress regarding State sandbag resources, management of State volunteers, additional SEOC staff, other flooding response resources, and information regarding the ability to assist with flooding from USACE. 1 active request for sandbags has been assigned, and 1 active request is pending additional information for flooding response. [WebEOC]

Region 1

- No significant updates to report at this time.

Region 2

Salt Lake County

- **New** Residents are invited to come to the Salt Lake County Flood Control Shed to fill sandbags, either for the community to use or to take home on the afternoon of April 28th and the whole day of April 29th at the Salt Lake County Flood Control Shed. [SLCo]
- **Active** Due to current hillside conditions, Ann's Trail in Draper is closed to public use. [Draper City]

Region 3

- No significant updates to report at this time.

Region 4

Beaver County

- **New** Sandbags are being filled and citizens are picking them up that live in flood-prone areas. Clearing has been done along Beaver Canyon waterways. A backhoe is also positioned at the diversion dam to remove debris from the grates. [LNO Correspondence]

Garfield County

- **New** The higher elevation snow is starting to melt. Panguitch Lake is still frozen. The Sevier River is rising, reaching the top of its banks, and spreading into low-lying pasture lands. [LNO Correspondence]

Iron County

- **New** Monitoring Cedar Canyon drainage, Coal Creek, Parowan Canyon drainage, and Patagonah Canyon drainage. No flooding issues at this time. Heavy equipment has been staged at possible choke points for debris. They are filling sandbags and making them available to the public. [LNO Correspondence]

Kane County

- **New** They are monitoring the melt from the Duck Creek area. Kanab Creek is flowing higher but not out of its banks. Sandbags have been placed around the county for residents to use. No flooding at this time. Low water crossings are subject to closures at any time. [LNO Correspondence]

Washington County

- **New** Monitoring Baker Dam and the melt from the Pine Valley Mountains that feed the Santa Clara River. Monitoring the Virgin River and its flow out of Kane County and Zion National Park. No flooding at this time. [LNO Correspondence]

Region 5

- No significant updates to report at this time.

Region 6/7

- No significant updates to report at this time.

Tribal Nations

- No significant updates to report at this time.

Impact and activity information is provided by Local Emergency Management partners, the State Emergency Response Team (SERT), and private and non-profit partners through various coordinating communication channels. *This is a developing situation, and information may quickly become outdated. Additional situation reports may be made as verified information becomes available.*

SPRING RUNOFF

TLP: WHITE

Disclosure is not limited.

Spring Runoff Season

Snowmelt & Elevated Flows

NATIONAL WEATHER SERVICE
NATIONAL OCEANIC & ATMOSPHERIC ADMINISTRATION
WEATHER.GOV/SALT LAKE CITY

Use caution around rising creeks, streams, rivers, and other waterways!

Water is expected to be running **very fast and will be very cold**. Hypothermia and drowning are possible with even brief periods of time in the water.

Give swollen waterways a wide berth and **monitor children and pets closely** as they can quickly drown in the cold, fast flows.

Slot canyons may be inundated with snowmelt runoff and become extremely hazardous.
