TO ORGAN DONATION

London Layton's Story

London was the funniest person you have ever met. Her squeaky voice, humor, creative accents, and animated skits always kept us laughing. She loved to dance and perfected her talent on several competitive dance teams. This beautiful, happy girl was a friend to everyone. Even now, her family is still reminded of her kindness and impact in the world. The day before London died, she had a conversation with her mom in this very building about checking "YES" on the donor box of her driver license application. London made the decision on her own to be a donor: to help and give another the truest gift.

We are so proud of her choice; London's cornea and tissue donations have been particularly important in helping our family and friends heal.

Organ, Eye, and Tissue Donation is an act of LOVE...the selfless choice to donate will give others the gift of life and opportunity.

We miss London every minute of every day. Even so, it is helpful to know a part of her is still living on in someone else.

We encourage you to check "YES!"

-The Layton Family

1 "YES" = Many Lives Impacted
